# AEGIS EHS SOLUTIONS

A PARSEC PACIFIC  
COMPANY

# About Aegis Safety Solutions

We specialise in delivering Environment, Health & Safety (EHS) systems integration services.

Our services include advice on system selection, business requirements reviews, system integration design, project management, testing and other implementation services to medium-large sized organisations.

We primarily work with Health & Safety teams – around the world – to design and deliver robust and fully integrated EHS technology solutions; and support your team via Managed Services – once the project team has disappeared.

# EHS Consulting Services

## Software Selection

We analyse your requirements and assess the market for software “best fit”.

## Project Management

We project manage EHS software design and deployment ensuring robust integration with your existing ERP systems

## Design, Test, Implement

A range of PMO services like Business Analysis, Change (training) mgmt and Testing to ensure high quality

## Managed Services

From “service desk” style support, through to KPI Reporting and Testing – our Managed Service team helps you operate your EHS software enabling you to focus on working with your customers

# FAQs

What is the advantage of hiring a consultant instead of doing it in-house?

We leverage years of experience in delivering integrated EHS systems into large scale organisations – so we understand the challenges. We know the leading EHS software products and risks that need to be managed. In short, we reduce risk, save money and deliver long-term value to your business.

What kind of deliverables are to be expected?

We produce a range of Project outcomes including deliverables including Business Cases, Requirements Documents, Project Initiation Documents (PIDs), Project Plans, Design & Architecture documents, Change and Test Strategies and Plans, Regular Status Reports and Steering Committee packs.

How long will the project take and how long until results can be measured?

Project lengths can vary depending on the requirements, especially if there's a bespoke nature to some of the modules. Typically EHS systems integration into a large organisation can take 6m-12 from when the initial contract sign-off point. Early engagement of Project Management and related integration services will reduce this time.

# Customer Reviews

Aegis EHS integration services enabled us to move off our legacy Health & Safety platforms and implement a fully integrated - best of breed solution - with Evotix /sai360. The project, especially integration and testing, was executed smoothly; and they delivered significant value to the organisation.

Director Health & Safety  
UNSW Sydney

Aegis consultants were engaged to run the RFP (tender) process for a major Australian university to acquire a new Health & Safety management system. The process was extremely transparent and the result was a highly competitive procurement process which led to a successful outcome for the university.
